- User Experience/User Interface

Storyboard: Persona: Sara.   Scenario: Inputing one of assignments as a reminder.
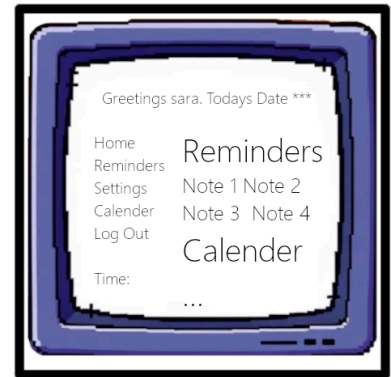

Sarah is second-year engineering student with a busy school schedule.

To manage her time and to ensure she remembers what is due when, she frequently inputs her assignments as reminders into the app.

Username: saraRocks
Password: ******

LOG IN

She types in her username and password in the fields since she already has an account on the app and presses the log in button.

Greetings sara. Todays Date ***

Once on the reminders page, she selects the add feature located on near the top of the reminders feature.

Title: Engineering Assignment #5
Message: I have another engineering assignment due on *** to finish up
Todays Date: ***
(Optional* Due Date:) ***

SUBMIT   BACK

She puts the title of her assignment, a message about it, todays date, and an optional due date beside it, in case she would like it, and then presses the submit button.

Greetings sara. Today's Date: ***

When she presses submit, she is taken back to the home screen, which shows her a overview of all the features and she can see her new reminder as part of the reminders.

She continues to add reminders in the same fashion until she is satisfied.
